EDUCATION

Bachelor of Engineering, Software Engineering

Nisantasi University, 2020 - 2025

GPA: 3.36 / 4.00

WORK EXPERIENCE

BytesandPixels | Frontend Developer

May 2023 - Present | Los Angeles, CA, US (Remote)

- Created Pure/Functional/Reusable and Accessible React components using TypeScript, React 18 and Storybook.
- Developed a responsive user interface utilizing React UI libraries such as Material UI and Tailwind CSS, resulting in a 30% increase in user engagement and 40% reduction in page load times.
- Implemented a responsive design system through Emotion and Styled Components, improving load times by 30% and contributing to a more seamless user experience across both desktop and mobile platforms.
- Designed a comprehensive user documentation for Apollo Client and React Query implementation, now serving as a reference guide for over 20 developers and enhancing onboarding efficiency for new team members.
- Constructed a state management system with Zustand, deployed across 30+ modules; facilitated a more efficient data management process, resulting in improved team collaboration and reduced development time by 15 hours weekly.
- Wrote unit tests using Jest, Istanbul for code coverage and Cypress for E2E Testing.
- Championed daily standup sessions that encouraged open dialogue, allowing 10+ team members to identify and address blockers promptly, increasing overall productivity and workflow efficiency.
- Created user-friendly Jira templates for Story and Epic tracking, contributing to a 40% increase in team engagement with project management tools, and fostering a collaborative environment for project execution.

- Established a structured API documentation process using Confluence, which enabled seamless updates and ensured accuracy; this initiative resulted in a 50% decrease in API-related queries from development teams.
- Collaborated with designers to create interactive prototypes in Figma that improved user feedback sessions; garnered three times more actionable insights compared to previous designs within one month of implementation
- Created detailed code documentation for newly developed React components; enhanced onboarding experience for new team members by decreasing ramp-up time in understanding system structure from three weeks to one week.
- Spearheaded a cross-browser compatibility initiative that ensured seamless functionality across eight major browsers through comprehensive testing cycles which enhanced user experience drastically among diverse audiences.

SKILLS

Programming Languages

- Proficient in: JavaScript, HTML5, CSS, React, TypeScript
- Working knowledge of: React, TypeScript, React Query, Next.js, Tailwind CSS

Technologies

HTML & CSS, JavaScript, React, TypeScript, Tailwind, Git, Node, MongoDB, REST, Cypress, Jest, GraphQL, Next.js, Zustand, Strapi, Figma, UI Design, Storybook, Jira, React Query

LANGUAGES

English, Highly proficient
